

Caribsoft India is an ISO 9001:2000 certified company that offers services in various technology domain executed by relevant skilled resources. Caribsoft India is focused primarily on small and medium sector businesses that have IT projects that are too small for the Tier 1, 2 or 3 outsourcing companies and whose internal IT staff are focused on the core-competencies of the daily business or may just not have the sufficient internal IT staff to handle the immediate needs or the demanding timeline.

Caribsoft can execute Application development projects in the following technologies:

- JAVA/J2EE web application design and development
- Microsoft .NET web application design and development
- Software Quality Assurance/Testing
- Refactoring /Code Remediation Services

Caribsoft India has been set up by Sujit Sarkar, alumni of the prestigious Indian Institute of Technology, Kharagpur, India. Sujit has 18 yrs of experience working with several large companies ranging from CMC to CitiGroup India. Sujit founded Caribsoft Info systems Pvt Ltd (*Caribsoft India*) in 2005 to provide offshore project capabilities for Caribbean clients. Since 2007, he has moved to Atlanta to offer Caribsoft services to US SMB customers.

Caribsoft India is a fully equipped ISO 9001:2000 certified software development / support center in Kolkata (Calcutta), India secured by controlled access. This centre is configured as 24/7 development center with UPS and Generator backup. It has Servers secured by CISCO firewalls and extends VPN connectivity to authorized clients. There is IP-PBX capable of extending local extensions to any authorized VoIP clients anywhere in the world. There is a US/Atlanta telephone number for India office which can be used by US customers for dialing in. ***The Caribsoft India team is composed of resources skilled on JAVA and Microsoft technologies and experienced in working on mission critical projects with aggressive schedules.***

Risk Free Proof of Concept:

For customers keen on engaging our services, Caribsoft India will develop a Risk Free No Cost Proof of Concept (RFPoC) of the critical path in the project to demonstrate both its understanding of the customer's requirements as well as the strength of its technical resources. Caribsoft India can provide this based on its experience on understanding critical 'pain points' of the SME customer and its commitment to bringing out the best from its internal human capital

Refactoring / Remediation Services:

We can fix IT projects gone wrong. In this offering, we take the application from client with stated problems, analyze the source code using automated and manual code inspection and provide services with a Free Proof-of-Concept, to fix the problems.

Caribsoft India has two (2) local USA locations and they are Orlando, Florida and Marietta, Georgia.
